<b>Materials</b>	Choices encourages families to select the learning resources and curricula that will successfully support the student to demonstrate mastery of "I can" learning objectives. The inclusion of families and educational choices creates greater variety in how young people learn and succeed.	Customized grade-level kits support each student's learning style. Bridgeway, a BEST partner, is a trusted and well-respected homeschool content developer. Bridgeway's unique approach to individualized education has helped thousands of students thrive and reach their goals. Students are also offered enrichment support through digital curriculum that meets students at their level and challenges them to move forward.	A flexible learning environment and modern educational technology serve learners with diverse backgrounds and goals. With a standards-based online curriculum, combined with superior individualized support, BEST Academy creates a learning environment that empowers students to rise to the challenge of independent, self-directed learning. BrightThinker and Accelerate Learning, award-winning curricula, are utilized to support core subjects. Strong evidence-based supplemental Lexia and DreamBox are designed to support students where they need assistance and challenge them.
<b>Student Experience</b>	Through a partnership between the school and parent/caregiver, students do their own research and ask questions, instead of relying on pre-selected materials assigned by a district. They also take an active role in their educational path by following their interests and working closely with their assigned teacher to create assignments and track progress.	Students have the flexibility to reinforce learning through multimodalities approach through a combination of print and digital resources that support their individual learning style. Optimal for students that want to have a complete learning experience and engage with physical materials (books, manipulatives, handwriting, drawing, etc.)	Students received structured curricula that streamlines differentiation opportunities, to personalize and pinpoint where learners are in their learning. Optimal for students that want the flexibility of a digital learning environment while providing teacher support to guide them in their learning experience.
